Changmin Lim (Chang)

(646) 887-5066 | cl2534@nyu.edu | https://www.imchorong.com | https://github.com/cl2534

Friendly full stack developer with an eye for new adventure. Having a logical mind, I love the ability to build new things while analyzing the many ways to develop an application. Prior to founding a Boston branch of Give Orange (a non-profit organization), I developed leadership skills while serving in the Korean Army.

EXPERIENCE

Give Orange, Inc   Founder of Branch   NYC & Boston   Jan 2016 - Aug 2018

- Launched 20+ fundraising events in Manhattan & Boston with Project Development Team
- Worked as Liaison Officer for Boston branch & Presidential Board to carry out directives & resolutions
- Founded Boston branch with 6 founding members and involved with official registration in Massachusetts State

Republic of Korea – Army   6th Ammunition Depot   Republic of Korea   Oct 2013 - Jul 2015

- Managed and maintained 12 ammunition bunkers
- Tracked & recorded ammunition transports and bunker status
- Acted as a Squad leader with 12 cadre members.

HanMag Securities   Internship   Republic of Korea   Jun 2012 - Aug 2012

- Monitored & recorded historical FX margin trade data
- Compiled & reviewed financial documents on Excel
- Developed an idea of tailored solution for clients who wish to invest with low latency trading environment

---

PROJECT

Picky Eater   (https://www.imchorong.com/projects/pickyEater/)

- App that allows user to play a cuisine tournament game
- Displays a list of restaurants near user's location using Yelp API
- Developed by using Ruby on Rails on Front-End & Back-End

Poppin   (https://young-thicket-55460.herokuapp.com/)

- App that allows users to share their outfit posts and to create outfit posts based on style categories
- Developed by using React Front-End / Ruby on Rails Back-End

NYU Sales   (https://www.imchorong.com/projects/nyuSales/)

- App for college students to sell their school needs and leave comments to communicate each other
- Developed by using React/Redux Front-End and Ruby on Rails Back-End

---
